## Photo Business Focus

# Javanese Chilies

(Piper Retrofractum)

Javanese Chilies are native to Indonesia, growing in places where the soil is not damp and sandy, flat areas up to 600 m above sea level (asl). In general, Javanese Chili / Herbal Chili plants are propagated in 2 ways, namely generatively (using seeds) and vegetatively (using stem shoots such as cuttings).

In 100 grams of Javanese Chili contains:

Calories : 351 kcal

Carbohydrate : 64 gr

Fat : 3,3 gr

Proteins : 10 gr

Food fiber : 25 gr

Apart from that, Javanese chilies also contain alkaloids, analgesics and beta sitosterol.

We are PT. Diamond Star Indonesia is ready to meet the needs of our customers in large numbers because we are supported by professional Partner Farmers.

Production capacity : 5 tons / month

Export destination countries : Arab Emirates, India, China, Nepal, Pakistan, Bangladesh, Japan, Germany, Malaysia, Vietnam, England and Turkey.

# Javanese Chilies

## Product Specification
